The character in History, when I meet
deslike

The character in History when I meet
deslike is Catherine de Medici. I dislike
her because she was so unkind and she
was always trying to gain her own
ends. She, with the aid of her many
connivers, was able to get rid of many
people who happened to be her enemies
or in the way of her plans. Never

really used her for some reason because
to trust in her confidence she was liable
to arrange that they came to an
untimely end.

Catherine de Medici had many ways of
disposing of her enemies. She executed
the Borgias in many ways, but she
also had a private chemist who converted
poison for her.

Catherine de Medici who was Queen of
France for some time and the Queen
mother later, used her power in many
bad ways. When her daughter

Marguerite de Valois was going to
be married to Henry of Navarre and
many of the Huguenots were in Paris she
persuaded her son (who was king of
France) to agree to the massacre of
these Huguenots. It ^{is} ^{the night} after

Marguerite had been married, all
the Roman Catholics rose and

massacred all the Huguenots. The King
of France was ^{not} very interested that
he had agreed to the Massacre, but
Catherine de Medici never showed any
regret. She was of course Roman Catholic
herself and hated all the Huguenots.

I dislike Catherine de Medici because
she does not seem to have possessed even
the slightest redeeming point to her
character; she does not seem to have
loved anyone or been happy except
when making most mischief.

Perhaps she had an unhappy
childhood, but all the same I think
that she is about the most horrible
person I have ever heard of.
